

Product Showcase

Viroc & Perforated Viroc

Real concrete panels

From raw industrial vibes to a sophisticated urban feel, concrete is on the rise in interior design. Viroc is the clever new product making concrete style more achievable (with big functional benefits).

A cement bonded particle board (CBPB) material, Viroc combines the flexibility of pine wood particles with the strength and durability of cement. With the look of real concrete panels, it's the smart way to ensure interior walls make a statement in contemporary homes, hotels, restaurants, foyers and commercial fit-outs.

Concrete style and strength, the clever way

Take your pick of textures, with the choice of a polished, raw or sanded finish in different colours. Select contrasting shades or juxtaposition concrete-look panels with other materials for an elegant effect.

Go understated or choose to stand out: Viroc makes it all possible. And Viroc offers much more than good looks. It has the easy workability and installation of wood backed by structural strength you can count on. Great sound and thermal insulation boosts the comfort factor for modern living, dining, relaxing, meeting, working or shopping.

Features and Benefits

Viroc

Sheet size — 3000mm x 1250mm

Design — Manufactured from Portland Cement, an authentic natural concrete finish is achieved

Sustainability — Silica-free and manufactured using 100% recycled plantation PEFC Certified timber

Application — Suitable for internal and external use

Thickness — Available in 12mm and 19mm thickness

Sealer — If used for flooring, benchtops, splashbacks, or externally a natural-look sealer coat is to be applied to protect from staining

Fire rating — Ground 1 internally and BAL29 externally

Custom colours are available on request for indoor use
