Beachclad

Sustainably sourced, Australian made innovations

Timber is a sustainable, renewable, carbon-positive resource that can reduce the carbon footprint of your project. Designing with timber enhances the sustainability of your space by capitalising on natural materials that can be re-purposed in the future.

At Modinex, we pride ourselves on being environmentally responsible. Our local base gives us the advantage of collaborating closely with architects and designers. By understanding your needs, we can create sustainable design solutions that are compliant, fit-for-purpose and brimming with natural beauty.

Our manufacturing plants utilise natural timber plantations that are PEFC certified, ensuring our design collections that are sourced from sustainably managed forests. We also use environmentally sustainable, ultra-low VOC coatings to protect our environment for the generations to come.

Rustic, seasoned timber: introducing Beachclad

This trending new product range, in Knotty Grade Western Red Cedar, has a rustic Bandsawn face and comes in a range of pre-finished, beach-themed colour washes. Designed to produce the effect of age-weathered or charred timber, Beachclad allows architects and designers to specify rustic, seasoned timber from the outset, resulting in yearned-after natural vogue effects. Available in four popular Cedar Sales profiles, Beachclad offers distinctive styling and plenty of versatility.

Features and Benefits

Design — Enhanced weathered character that is available in random or set length options

Sustainable timber — Sustainably harvested plantation timber species that is 100% PEFC Certified

Variety in timber — Available in four popular profiles in Knotty Grade Western Red Cedar

Pre-finished coatings available — Available in a range of standard colours

Application — Suitable for out of weather and external use
