## Austratus Grid - Timber

## New thinking. New simplicity.

When it comes to inspiring spaces, nothing makes an impact quite like an architectural timber ceiling, wall or screen.

Colour, warmth, tone and texture – timber has a unique, sophisticated appeal.

However, the associated lead times, as well as the need for expert-installation skills, has traditionally rendered genuine timber statements out of reach for many commercial and residential projects ...until now.

Introducing Austratus, a new product innovation from architectural timber specialists, Modinex.

# The simplicity and convenience of the Austratus patented system

Our patented fitting system allows continuous lengths of timber to be simply and easily clipped into a suspended ceiling. It can also be screwed directly onto existing walls and ceilings.

Fit-out companies, builders and architects will agree, Austratus makes it easy to achieve brilliant results. How?

## Design and Performance

Design — Suspended grid ceiling solution, designed for quick and ease of installation

Fire rating — Varies by timber species. All Modinex timber species can achieve Group 3 for internal applications (Group 1 when treated with Fireshield). Modinex hardwood species are suitable for external applications up to BAL29. Softwood species do not meet the material requirements for BAL ratings

Sustainability — Available in Green & Supergreen aluminium to reduce CO2 emission by 50-75% or a large range of sustainable timber species

Pre-finished coatings — Available in a range of standard colours

Application — Suitable for internal and out of weather applications only

Grid size — Softwood species are suitable for a grid size of up to 1m x 1m. However, Hardwood species are only suitable for up to 0.6m x 0.6m and a max batten depth of 140mm

## Profiles

### 30mm Fin series

40mm, 60mm, 90mm, 140mm and 190mm depth available

### 40mm Fin series

40mm, 60mm, 90mm, 140mm and 190mm depth available

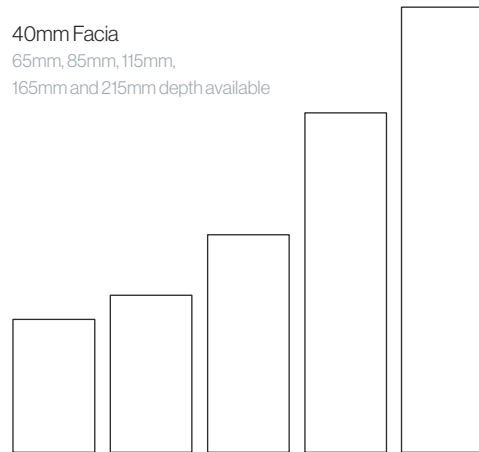

### 30mm Facia

65mm, 85mm, 115mm, 165mm and 215mm depth available

### 40mm Facia

65mm, 85mm, 115mm, 165mm and 215mm depth available

## Choose your finish

See Modinex website for full range of colour and coating options.

# Timber Species

All our ranges of timber species are available in set length and random length. Please contact our projects team for more information.

### — SOFTWOOD

Western Red Cedar, Alaskan Cedar & Hemlock are the only suitable species for 9mm thick profiles. All Softwood species can be used for 12mm thickness or greater. For external applications, please use 18mm thick profiles or greater.

Western Red Cedar

Plantation  
100% PEFC Certified  
Greentag Certified

Western Red Cedar - Tight Knot

Plantation  
100% PEFC Certified

Hemlock

Plantation  
100% PEFC Certified  
Suitable for indoor and  
out-of weather use only

Hemlock - Thermally Modified

Plantation  
100% PEFC Certified

Alaskan Cedar

Plantation  
100% PEFC Certified

Accoya

Plantation  
100% PEFC Certified

### — HARDWOOD

Hardwood species can be used for 15mm thickness or greater for out of weather applications and 18mm thickness or greater for external use.

American Oak

PEFC Certification is available

Blackbutt

FSC Certification is available

Spotted Gum

FSC Certification is available

Ironbark

FSC Certification is available

Southern Spotted

PEFC Certification is available

French Oak

PEFC Certification is available

Create stunning wow factor  
with flexibility of style, texture,  
colour, shape and species.

Talk with our design team today about how to maximise the grandeur of your space. Our extensive product range puts a wealth of inspiration at your fingertips. We can even collaborate with you to innovate custom solutions, specifically designed to bring your vision to life and elevate your space with exclusive designer appeal.
