## Viroc Flooring

## Concrete-look flooring, built for performance

From raw industrial style to refined commercial spaces, concrete-look flooring continues to define contemporary interiors. Viroc Flooring makes it easier to achieve that aesthetic, with the added benefits of durability, flexibility, and compliance.

Manufactured from cement-bonded particle board (CBPB), Viroc combines the workability of timber with the strength of cement. Supplied raw and ready for onsite sealing, it's designed to withstand wear in high-traffic environments—ideal for retail, hospitality, residential, and public buildings.

# Concrete-look flooring, made for modern spaces

Choose a finish that fits your project—polished, raw or sanded, sealed in your preferred tone. Viroc Flooring delivers the aesthetic of concrete with the flexibility to customise onsite.

Engineered from cement-bonded particle board, it installs with standard tools and offers the durability to handle high-traffic environments. Strong, compliant, and visually striking, it's designed to perform in commercial, public, and residential interiors.

## Technical Highlights

Board size — 3000mm x 1250mm

Material — Cement-bonded particle board with natural concrete texture

Finish — Supplied raw for onsite sealing in your preferred finish

Workability — Cuts and installs like timber using standard tools

Application — Suitable for overlay or structural interior flooring

Durability — Impact resistant, ideal for high-use areas

Fire performance — Group 1 rated

Safety — Silica-free for safer handling onsite

Sustainability — Made using recycled wood fibres from PEFC-certified sources

## Finishes

The Viroc panel is supplied raw, unfinished. The surfaces show some irregularities and imperfections, such as small incrustations, stains, scratches, small wood chips and salts resulting from chemical reactions.

Whenever the panel is applied in plain view, even if a varnish finish is not to be applied, the visible surface must be cleaned/polished with a cleaning disc to remove dust, scratches, dirt and salts.

Cleaning/polishing does not change the natural appearance of the panel, maintaining the stains and heterogeneities that characterise it, as well as some salts and incrustations embedded in the surface. The factory provides suitable cleaning discs, which can be supplied at the customer's request.

It is recommended that the Viroc panel be finished with a varnish to protect it and make it easier to clean and maintain.

# How to specify

Download REVIT files, installation instructions, product care and technical information at [modinex.com.au](https://modinex.com.au)

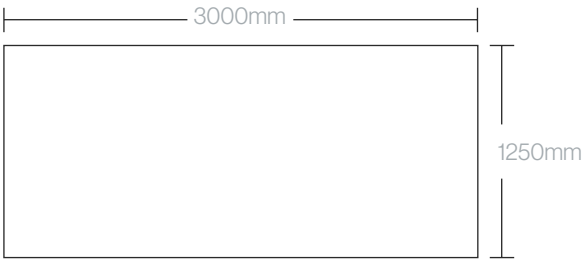

## Choose your shape

PROFILE CODE	DIMENSION
PR-VRC-COM-12X3000x1250	1250mmW x 12mmD x 3000mmH

## Profile

Viroc

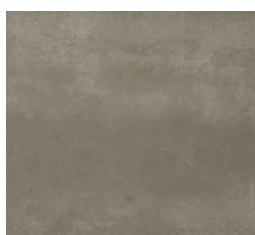

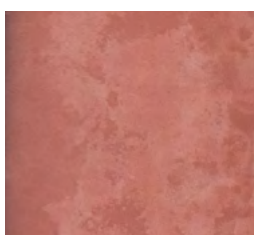

## Choose your finish

See Modinex website for full range of colour and coating options.

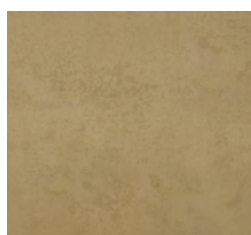

## Colours

Grey
