Viroc

Real concrete panels

From raw industrial vibes to a sophisticated urban feel, concrete is on the rise in interior design. Viroc is the clever new product making concrete style more achievable (with big functional benefits).

A cement bonded particle board (CBPB) material, Viroc combines the flexibility of pine wood particles with the strength and durability of cement. With the look of real concrete panels, it's the smart way to ensure interior walls make a statement in contemporary homes, hotels, restaurants, foyers and commercial fit-outs.

Concrete style and strength, the clever way

Take your pick of textures, with the choice of a polished, raw or sanded finish in different colours. Select contrasting shades or just a position concrete-look panels with other materials for an elegant effect.

Go understated or choose to stand out: Viroc makes it all possible. And Viroc offers much more than good looks. It has the easy workability and installation of wood backed by structural strength you can count on. Great sound and thermal insulation boosts the comfort factor for modern living, dining, relaxing, meeting, working or shopping.

Design and Performance

Sheet size — 3000mm x 1250mm

Design — Manufactured from Portland Cement, an authentic natural concrete finish is achieved

Sustainability — Silica-free and manufactured using 100% recycled plantation PEFC Certified timber

Application — Suitable for internal and external use

Thickness — Available in 12mm and 19mm thickness

Sealer — If used for flooring, benchtops, splashbacks, or externally a natural-look sealer coat is to be applied to protect from staining

Fire rating — Group 1 internally and BAL29 externally

Custom colours are available on request for indoor use

Finishes

The Viroc panel is supplied raw, unfinished. The surfaces show some irregularities and imperfections, such as small incrustations, stains, scratches, small wood chips and salts resulting from chemical reactions.

Whenever the panel is applied in plain view, even if a varnish finish is not to be applied, the visible surface must be cleaned/polished with a cleaning disc to remove dust, scratches, dirt and salts.

Cleaning/polishing does not change the natural appearance of the panel, maintaining the stains and heterogeneities that characterise it, as well as some salts and incrustations embedded in the surface. The factory provides suitable cleaning discs, which can be supplied at the customer's request.

It is recommended that the Viroc panel be finished with a varnish to protect it and make it easier to clean and maintain.

How to specify

Download REVIT files, installation instructions, product care and technical information at [modinex.com.au](https://www.modinex.com.au)

Choose your shape

PROFILE CODE	DIMENSION
